

Joule Jumpstart: Skills for Customer Success

Joule Desktop can run installable "skills" that automate real parts of a CSM's day: account health checks, renewal-risk notes, adoption and consumption reporting, business-review decks, and portfolio triage. This is a curated shortlist aimed at what Customer Success Managers actually do, so you don't have to dig through 600+.

Curated for SCM Customer Success Managers · Source: Joule Hub (hub.joule.only.sap) · Snapshot: 12 Aug 2026

How to install any skill (almost instant)

1. Click **Download skill** on any card below to save the file (a SKILL.md, or a .zip for multi-file skills).
2. In **Joule Desktop**, open **Extensions**, click the + **New** dropdown → **Add Skill** → **Upload**.
3. Drag and drop the file (or click to browse). The skill is added in about a second, then just ask Joule in plain language.

Check the "Needs" line before you install. Skills marked **Works out of the box** run immediately. Skills marked **Needs a connector** need an MCP connector (like MXP for ONE360 data, or EKX) set up first, or they won't return data. Joule flags this for you: after upload, a skill missing a required connector shows a **red dot** next to its name in the Skills list. If you haven't set up connectors yet, start with the out-of-the-box skills.

A note for CSMs. Several of these skills read live SAP data (ONE360/MXP for consumption and adoption, Databricks for churn scores, ECS dashboards for account health). Others are community-built for specific line-of-business or renewal-ops workflows and may assume access you need to request. Each card's "Needs" line tells you what it depends on. Start with account health, adoption, and business-review skills, the ones that map straight to your renewal and value-realization work.

▼ Setting up a connector (MCP) — one-time, ~1 minute

A "connector" (MCP) is what lets a skill reach live SAP data — MXP for ONE360 accounts (consumption, adoption, renewals), EKX for the knowledge graph, and so on. On the amber cards below, each required connector is a clickable chip: click it to open that connector's page on the Hub, where you copy its server address. You connect each one once; after that, every skill that uses it just works.

Grey chips (for example **Knowledge @ SAP (admin-managed)** or **Outlook (built-in)**) need **no action from you** — SAP pre-provisions them or Joule includes them. Only the **blue chips** are ones you connect yourself.

To add a connector in Joule Desktop:

1. Open the **Extensions** panel (puzzle icon in the sidebar).
2. Click the dropdown arrow next to **+ New**, then **Add Connector**.
3. Paste the connector's **server address** (from its Hub page — click a chip below to find it) and click **Connect**. Joule auto-detects transport and authentication.
4. Your browser opens a sign-in page — log in with your SAP account if prompted, then click **Allow** on the consent screen.
5. The tab closes and the connector shows as **Connected**. Done — sign-in is a one-time step per connector.

Browse all available connectors any time at hub.joule.only.sap/mcp-servers. Some connectors require SAP VPN (your SAP PC's GlobalProtect handles this automatically) and, for a few, access may need to be requested — the connector's own Hub page has the detail.

1. Account Health & Renewal Risk

The heart of the CSM job: spot at-risk accounts early and protect the renewal. Some of these pull live risk scores and dashboards, so check the "Needs" line.

Churn Risk Advisor v1.0

79 installs

Needs a connector

Databricks (community)

Answers questions about account churn risk using Databricks ML scores. Returns risk tier, score, and the drivers behind it, so you know which accounts need attention first.

Needs Community skill; uses Databricks ML churn scores. Confirm access to the data source on its Hub page.

Try saying What's the churn risk for [account]?

↓ Download skill

[View on Hub →](#)

Churn Risk Account Agent v1.0

49 installs

Needs a connector

SAP data source (community)

Answers natural-language questions about opportunity-level churn risk for B2B accounts, so you can drill from a book-of-business view down to the specific deals at risk.

Needs Community skill; reads opportunity-level churn risk data. Check its Hub page for the required source.

Try saying Which opportunities are at churn risk for [account]?

↓ Download skill

[View on Hub →](#)

CM Dashboard Account Health v1.0

13 installs

Needs a connector

ECS CM Dashboard (community)

Queries the ECS Customer Management Dashboard for an account's top issues, SLA events, and missing backups, giving you a live technical-health read for ECS-managed customers.

Needs Community skill; access to the ECS Customer Management Dashboard. Relevant for ECS/private-cloud accounts.

Try saying Show account health for [customer]

↓ Download skill

[View on Hub →](#)

hcm-renewal-risk-note v1.0

33 installs

Works out of the box

Generates and updates SAP HCM "ACV at risk" notes in the standard Harmony/CRM format, so risk documentation is consistent and ready to log. Built for HCM but a useful template pattern for any pillar.

Needs Nothing to start; you provide the account and risk detail. Community skill.

Try saying Draft an ACV-at-risk note for [account]

↓ Download skill

[View on Hub →](#)

Partner Renewal and Churn Outlook v1.0

26 installs

Works out of the box

Transforms any CSV or Excel renewal export into a partner-first executive Excel dashboard of renewal and churn outlook, so you can see the whole book at once from a data export.

Needs A renewal export (.csv or .xlsx). Community skill; partner-oriented but works on any renewal export.

Try saying Build a renewal and churn outlook from this export

↓ Download skill

[View on Hub →](#)

2. Adoption & Consumption

Prove the customer is using what they bought. Most of these pull live ONE360/MXP data, so they need the MXP connector + VPN.

adoption-pov v1.0

87 installs

Needs a connector

MXP

Two-slide SAP-branded Adoption Point of View PPTX for a cloud customer: consumed ACV, product usage ratios, renewal dates, quadrant placement, risk indicators, and prioritized recommendations. A CSM centerpiece for adoption conversations.

Needs MXP ONE360 MCP connector.

Try saying Show me the adoption POV for customer 0004289738

↓ Download skill

[View on Hub →](#)

Customer AI Units Consumption Report v1.0

198 installs

Needs a connector

MXP

SAP-branded executive PPTX slides for AI-units consumption from ONE360: KPI strip, month-over-month chart, top-20 features table, and observations. Batch-processes multiple customers, so you can prep a whole portfolio at once.

Needs MXP MCP server (ONE360 AI Unit balance + consumption).

Try saying AI units report for [customer name]

↓ Download skill

[View on Hub →](#)

Customer Overview v3.0

3,481 installs

Needs a connector

MXP

Knowledge @ SAP (admin-managed)

Generates a ONE360 customer overview (company profile, financials, adoption, renewals, shelfware, account owner) by loading eight MXP datasources in parallel. Your fast whole-account read before any customer touch.

Needs MXP connector + SAP VPN active. Web enrichment uses Knowledge @ SAP, which SAP pre-provisions.

Try saying Customer overview for Adidas

↓ Download skill

[View on Hub →](#)

AI Onboarding Accelerator v1.0

30 installs

Works out of the box

Generates a personalised SAP AI Readiness Brief and a 90-day learning curriculum for a customer, useful for accelerating time-to-value in the onboarding phase and framing an adoption plan.

Needs Nothing to start. Community skill (uses web/knowledge content).

Try saying Build a 90-day AI onboarding plan for [customer]

↓ Download skill

[View on Hub →](#)

3. Value Realization & Business Reviews

Connect outcomes to spend and run credible QBRs/EBRs. The account-plan and game-plan skills read live data; the rest work from your inputs.

CSM Game Plan – Executive Summary Deck v3.0

127 installs

Needs a connector

MXP

Generates a "Game Plan – Executive Summary" PowerPoint from a monthly cACV Excel file: one slide per account with KPI donut charts (forecast achievement, annual gap, current gap) and a structured panel (account overview, what I need, cACV risk, mitigation plan). Enriched with MXP functional-footprint data. Built explicitly for CSMs.

Needs A monthly cACV Excel export. MXP connector for functional-footprint enrichment.

Try saying Build my CSM game plan deck (after attaching the cACV Excel)

↓ Download skill

[View on Hub →](#)

customer-briefing v1.0

285 installs

Needs a connector

MXP

Generates a customer briefing by loading account master data, cloud opportunities, and consumed ACV, a focused pre-meeting read for a business review or check-in.

Needs Connection to the MXP (mxpresso) MCP server + SAP VPN.

Try saying Customer briefing for [company]

↓ Download skill

[View on Hub →](#)

Executive Briefing v1.0

235 installs

Works out of the box

An AI briefing analyst for SAP customer meetings: give it a customer name plus meeting context and it produces a focused briefing. Designed for a single account or GU hierarchy, not multi-account consolidated views.

Needs Customer name + meeting context. Community skill.

Try saying Prepare an executive briefing for my meeting with [customer]

↓ Download skill

[View on Hub →](#)

Business Case v5.0

158 installs

Needs a connector

EKX

Guides a value-advisory business case through a 20-step, approval-gated workflow from intake and evidence research to a brand-compliant SAP PowerPoint, with value modeling and quality audits. Useful for value-realization narratives and expansion cases.

Needs EKX MCP for SAP-claim validation. Hands off to the SAP Corporate PPTX skill for the deck.

Try saying Build a business case for [customer/engagement]

↓ Download skill

[View on Hub →](#)

Detailed Account Briefing v1.0

153 installs

Needs a connector

EKX

A 17-section, evidence-tagged account briefing: company profile, financials, strategy, leadership, M&A, competitive landscape, risks, and SAP implications, built from parallel web-research subagents with EKX validation. Deep prep for an EBR or exec engagement.

Needs EKX MCP connected. Uses built-in web search.

Try saying Account briefing on [company]

↓ Download skill

[View on Hub →](#)

4. Executive Communication & Decks

Turn data into a business-review narrative execs will read. All work out of the box.

Executive Communication v2.0

1,640 installs

Works out of the box

Transforms rough corporate notes into concise, executive-ready communication using a fixed Headline, Context, Impact, Decision/Support-Needed, Action structure. Built for the exec-presence side of the CSM role.

Needs Nothing.

Try saying Turn these notes into an executive update

↓ Download skill

[View on Hub →](#)

Power Point v2.0

9,654 installs · most-used skill

Works out of the box

Generates or edits a brand-compliant SAP 2026 PowerPoint deck from a topic and audience: plans the outline, drafts content and design in parallel, and runs an automated brand-QA pass. The workhorse for QBR/EBR decks.

Needs Nothing (Python auto-installs in the sandbox). Use a local folder, not OneDrive-synced, or file execution is blocked.

Try saying Create a business review deck for [customer]

↓ Download skill

[View on Hub →](#)

Data Analyzer v2.0

1,974 installs

Works out of the box

Profiles any dataset into a self-contained SAP-branded HTML report with executive findings, interactive charts, and a devil's-advocate quality review. Point it at a usage or consumption export to find the story for a review.

Needs Nothing (libraries auto-install; internet needed to load charts when opening the report).

Try saying Analyze this data

↓ Download skill

[View on Hub →](#)

Excel v2.0

2,715 installs

Works out of the box

Creates, edits, and analyzes SAP-branded Excel spreadsheets locally with pandas and openpyxl: formatting, multi-sheet workbooks, formulas, plus a formula-error verification pass. For portfolio trackers and success plans.

Needs Nothing.

Try saying Build a portfolio health tracker

↓ Download skill

[View on Hub →](#)

Word v2.0

2,751 installs

Works out of the box

Creates, reads, and edits SAP-branded Word documents locally: full formatting, tables, table of contents, images, tracked changes, comments. For success plans, account summaries, and follow-up docs.

Needs Nothing.

Try saying Create a success plan document for [customer]

↓ Download skill

[View on Hub →](#)

5. Portfolio, Inbox & Meetings

Stay on top of a large book of business and keep every customer touch followed up. Meeting skills work out of the box; inbox skills use Outlook.

daily-briefing v1.0

1,276 installs

Needs a connector

Outlook (built-in)

Analyzes 72+ working hours of incoming and outgoing email into a categorized morning briefing: todos, commitments, delegated tasks, and pending replies, with owners, deadlines, and priorities. Keeps a big portfolio from slipping.

Needs Outlook email access (inbox + sent items).

Try saying What's my daily briefing?

↓ Download skill

[View on Hub →](#)

Inbox Analyst v1.0

184 installs

Needs a connector

Outlook (built-in)

Five-mode Outlook email and calendar assistant: Morning Briefing, Pending Emails, Deep Todo Extraction, Today's Agenda, and Vacation Catchup, with holiday-aware dates.

Needs Joule Desktop's built-in Outlook email + calendar access configured.

Try saying morning briefing or back from vacation

↓ Download skill

[View on Hub →](#)

Daily Email Triage v2.0

3,152 installs

Needs a connector

Email/Outlook MCP

Fetches today's incoming email and triages it into a ranked, bucketed priority report by urgency, tone, sensitivity, and meeting signals. Does not draft replies.

Needs An email MCP connector (works with any Outlook-connected account).

Try saying Triage my emails from today

↓ Download skill

[View on Hub →](#)

Meeting Report Generator v3.0.3

SCM repo

Works out of the box

Turns a meeting transcript (.docx, .pdf, .srt, or .txt) into a structured, SAP-branded Word report. When an SAP product demo is detected, it adds a customer-facing Demo Addendum. Built and maintained by the SCM team.

Needs Nothing to start. The Demo Addendum is optionally enriched by the AVA + Knowledge @SAP MCPs when connected, and works without them.

Try saying Create the meeting report (after attaching a transcript)

↓ Download skill

[View in SCM catalog →](#)

SAP Minutes Generator v1.0

2,896 installs

Works out of the box

Converts raw meeting notes into a structured minutes table (Type, Description, Assignees, Due) that maps one-to-one to the internal SAP Shared Minutes tool's categories.

Needs Nothing. Paste your notes.

Try saying `Create minutes` (after pasting raw notes)

↓ Download skill

[View on Hub →](#)

6. Renewal Operations & Escalation

The commercial and support machinery around a renewal. These are role-specific community and program skills, so confirm the process applies to you.

Value Acceleration Services (VAS) / Renewal Rescue Program (RRP) Intake Support v1.0

20 installs

Works out of the box

Answers questions about the intake form for the Value Acceleration Services (VAS) / Renewal Rescue Program (RRP), so you can get an at-risk renewal into the right rescue program without hunting for process detail.

Needs Nothing to start. Official program skill; relevant when engaging VAS/RRP.

Try saying `How do I submit a Renewal Rescue Program intake?`

↓ Download skill

[View on Hub →](#)

Booking Readiness v1.0

12 installs

Works out of the box

Reviews SAP cloud renewal contracts by comparing a signed contract PDF against a deal-print PDF, flagging mismatches before booking. A check-step to keep a renewal clean on the commercial side.

Needs The signed contract PDF and the deal print PDF. Community skill (Cloud Renewal).

Try saying `Check booking readiness for this renewal`

↓ Download skill

[View on Hub →](#)

Cloud Renewal Order Form Scrubber v1.0

27 installs

Works out of the box

Reviews renewal Order Forms for red flags, cutting the hours normally spent scrubbing them by hand. Speeds up the commercial paperwork on a renewal.

Needs A renewal Order Form to review. Community skill (Cloud Renewal).

Try saying `Scrub this renewal order form`

↓ Download skill

[View on Hub →](#)

GCC Customer Triage Assistant v1.0

29 installs

Needs a connector

MXP

Generates a customer context brief for P1 incident triage, so when an escalation hits you can pull the account context fast and respond from a position of knowledge.

Needs MXP connector. Community skill oriented to incident triage.

Try saying `triage [company name]`

↓ Download skill

[View on Hub →](#)

7. New to Joule? Start Here

If Joule Desktop is brand new to you, these two get you oriented fast.

Joule Onboarding & Migration v2.0

783 installs

Works out of the box

Conversational setup that either migrates config, memory, and MCP mappings from another AI tool (Claude, Cursor, ChatGPT, Copilot) or guides a first-time user to build Joule memory from scratch.

Needs Python available on the machine. No MCP.

Try saying `help me set up Joule`

↓ Download skill

[View on Hub →](#)

Teach Me Joule Desktop v1.0

722 installs

Works out of the box

Joule Hub (admin-managed)

Interactive, adaptive 9-module course on Joule Desktop: installation, Outlook/Calendar/PPT integrations, Spaces, skill and MCP installation, custom MCP config, usage and cost tracking.

Needs Uses the Joule Hub connector, which SAP pre-provisions (admin-managed), so there's nothing to set up.

Try saying teach me Joule Desktop

↓ Download skill

[View on Hub →](#)

Browse the full catalog (600+ skills and MCP servers) at hub.joule.only.sap. Install counts are a snapshot from 12 Aug 2026 and change as adoption grows. This shortlist is curated for SCM Customer Success Managers; it is not the full library. Several skills are community-built for specific line-of-business or renewal-ops workflows, check each skill's Hub page for exact scope and access before relying on it.

Download links: each "Download skill" link pulls the skill file (a .md, or a .zip for multi-file skills) straight from the Joule Hub; then Upload it in Joule Desktop (Extensions → + New → Add Skill → Upload). The links require the SAP network, which your SAP PC's GlobalProtect VPN connects automatically.

Designed and powered by Mike Fecek and Claude.
