

Joule Jumpstart: Skills for Product Marketing

Joule Desktop can run installable "skills" that automate real parts of a PMM's day: positioning and messaging frameworks, battlecards and competitive digests, copy and storytelling, launch and enablement decks, and the strategy layer that ties it together. This is a curated shortlist aimed at what product marketers actually do, so you don't have to dig through 600+.

Curated for SCM Product Marketing · Source: Joule Hub (hub.joule.only.sap) · Snapshot: 12 Aug 2026

How to install any skill (almost instant)

1. Click **Download skill** on any card below to save the file (a `SKILL.md`, or a `.zip` for multi-file skills).
2. In **Joule Desktop**, open **Extensions**, click the **+ New** dropdown → **Add Skill** → **Upload**.
3. Drag and drop the file (or click to browse). The skill is added in about a second, then just ask Joule in plain language.

Check the "Needs" line before you install. Skills marked **Works out of the box** run immediately. Skills marked **Needs a connector** need an MCP connector (like MXP for ONE360 data, EKX, or Canva) set up first, or they won't return data. Joule flags this for you: after upload, a skill missing a required connector shows a **red dot** next to its name in the Skills list. If you haven't set up connectors yet, start with the out-of-the-box skills.

A note for product marketers. Positioning starts everything, so lead with the messaging and PMM-methodology skills. Most content and copy skills work out of the box on your own inputs; the account-briefing, competitive, and customer-positioning skills read live data and need MXP or EKX. A few are tuned to a specific team's brand (SAP Concur, GFA), treat those as strong patterns you adapt to SCM. Each card's "Needs" line tells you what it depends on.

▼ Setting up a connector (MCP) — one-time, ~1 minute

A "connector" (MCP) is what lets a skill reach live SAP data or tools — MXP for ONE360 accounts, EKX for the knowledge graph, Canva for brand-kit design, and so on. On the amber cards below, each required connector is a clickable chip: click it to open that connector's page on the Hub, where you copy its server address. You connect each one once; after that, every skill that uses it just works.

Grey chips (for example **SAP Enterprise Knowledge Graph (Beta)**) may be pre-provisioned or in beta — check the chip's Hub page. Only the **blue chips** are ones you clearly connect yourself.

To add a connector in Joule Desktop:

1. Open the **Extensions** panel (puzzle icon in the sidebar).
2. Click the dropdown arrow next to **+ New**, then **Add Connector**.
3. Paste the connector's **server address** (from its Hub page — click a chip below to find it) and click **Connect**. Joule auto-detects transport and authentication.
4. Your browser opens a sign-in page — log in with your SAP account if prompted, then click **Allow** on the consent screen.
5. The tab closes and the connector shows as **Connected**. Done — sign-in is a one-time step per connector.

Browse all available connectors any time at hub.joule.only.sap/mcp-servers. Some connectors require SAP VPN (your SAP PC's GlobalProtect handles this automatically) and, for a few, access may need to be requested — the connector's own Hub page has the detail.

1. Positioning & Messaging

The foundation everything else is built on. The methodology and framework skills work on your inputs; the customer-positioning skill reads live data.

SAP PMM Skill — Product Marketing Methodology v3.0

37 installs

Works out of the box

A product-marketing methodology for SAP PMMs: step-by-step positioning, a messaging house, battlecards, one-pagers, and talk-track methodology, with the SAP narrative cascade, audience adaptation, and quality gates. Works standalone or enhanced with domain reference files. Based on the PMA Core framework. The natural home base for a PMM.

Needs Nothing to start.

Try saying Build a messaging house for [solution]

SAP Strategic Messaging Framework v1.0

134 installs

Works out of the box

Guides you from early brainstorm to a complete, publish-ready messaging framework. Two modes: Brainstorm (a challenger-style thinking partner) and Workshop (a structured interview across Strategy, Framework, and Narrative). Covers solutions and products end to end.

Needs Nothing to start.

Try saying Workshop a messaging framework for [product]

↓ Download skill

[View on Hub →](#)

Brand & Creative – Messaging Skill v3.0

2,410 installs

Works out of the box

Creates strategic messaging frameworks according to the official SAP Brand Messaging Guidelines, guiding you from brainstorm to a complete framework. The widely-adopted, on-brand baseline for SAP messaging work.

Needs Nothing to start. Built by the SAP Brand and Creative team.

Try saying Create an on-brand messaging framework for [topic]

↓ Download skill

[View on Hub →](#)

customer-specific-autonomous-enterprise-positioning v1.0

51 installs

Needs a connector

MXP

SAP Enterprise Knowledge Graph (Beta)

Analyzes a customer's annual report to build a business-strategy map, then generates a contextualized SAP-branded Autonomous Enterprise positioning deck. Turns generic positioning into a tailored, evidence-backed story for a named account.

Needs MXP + SAP Enterprise Knowledge Graph (Beta) connectors.

Try saying Build Autonomous Enterprise positioning for [customer]

↓ Download skill

[View on Hub →](#)

autonomous-enterprise-assistant v1.0

102 installs

Needs a connector

MXP

Knowledge-grounded assistant for SAP's Autonomous Enterprise vision and evolved portfolio (Joule, Autonomous Suite, Industry AI, Business AI Platform, Agent-led Transformation), with positioning and objection handling. Keeps your narrative aligned to the current corporate story.

Needs MXP connector. Built by the Enterprise Architecture Excellence team.

Try saying How should I position the Autonomous Enterprise story?

↓ Download skill

[View on Hub →](#)

2. Competitive & Market Intelligence

Monitor the landscape and equip sales to win. The digest runs on web search; the account briefing reads EKX.

Competitive Intelligence Digest v2.0

112 installs

Works out of the box

Runs a weekly competitive digest across dimensions you define, with top items, summaries, and source links. Point it at the SCM landscape (o9, Kinaxis, Coupa, Infor, Oracle) to keep battlecards and positioning current.

Needs Nothing (web search enabled). Define your own competitor set and dimensions.

Try saying Run a competitive digest on o9, Kinaxis, and Coupa

↓ Download skill

[View on Hub →](#)

Detailed Account Briefing v1.0

213 installs

Needs a connector

EKX

A comprehensive, evidence-tagged briefing: company profile, financials, strategy, leadership, competitive landscape, risks, and SAP implications, built from parallel web-research subagents with EKX validation. Good market and buyer intelligence input for personas and proof points.

Needs EKX MCP connected. Uses built-in web search.

Try saying Account briefing on [company]

↓ Download skill

[View on Hub →](#)

SAP Roadmap search v1.0

218 installs

Works out of the box

Searches SAP product roadmap items from roadmaps.sap.com by product, topic, status, or time period, returning feature name, description, category, expected quarter, and status. Turn roadmap items into market-facing value statements.

Needs Nothing (uses built-in web search).

Try saying What's on the roadmap for SAP IBP?

↓ Download skill

[View on Hub →](#)

3. Content, Copy & Storytelling

Turn positioning into high-impact content and narrative. All work out of the box on your own inputs.

Master Copywriter v1.0

46 installs

Works out of the box

A world-class copywriter persona grounded in buyer psychology, the direct-response canon, and behavioral science. Activates for copy strategy, campaign positioning, long-form content, thought leadership, hooks, and headlines. (Tuned to SAP Concur brand standards, adapt the voice to SCM.)

Needs Nothing. Community skill; Concur-brand-tuned, adaptable.

Try saying Write launch copy for [product] aimed at the economic buyer

↓ Download skill

[View on Hub →](#)

Storytelling for Customer Presentations v1.0

31 installs

Works out of the box

A playbook of research-backed storytelling frameworks for high-stakes presentations and briefings: SCQA/Minto, Duarte Sparkline, StoryBrand, three-act data storytelling, the SUCCESs filter, and opener techniques. For building a narrative from a one-liner to a keynote.

Needs Nothing. Community skill.

Try saying Structure a keynote narrative for [launch] using SCQA

↓ Download skill

[View on Hub →](#)

SAP Writing Style Guide v1.0

542 installs

Works out of the box

Applies SAP's official writing and editorial standards to any content: brand voice, grammar, style, punctuation, naming conventions, word choice, and analyst content. Synthesized from brand.sap.com and the SAP Style Guide wiki. Keeps every asset on-voice.

Needs Nothing. Paste or attach the content to check.

Try saying `Edit this to SAP style`

↓ Download skill

[View on Hub →](#)

SEO — Google SEO Advice for SAP v1.0

14 installs

Works out of the box

A reference skill grounded in Google's official Search documentation, extended with SAP rules for www.sap.com: titles, meta descriptions, URL structure, headings, structured data, internal linking, and AI/generative search. For digital content that ranks.

Needs Nothing. Community skill.

Try saying `Optimize this page copy for SEO on sap.com`

4. Sales Enablement & Decks

Arm the field with credible, on-brand assets. All work out of the box.

Power Point v2.0

9,654 installs · most-used skill

Works out of the box

Generates or edits a brand-compliant SAP 2026 PowerPoint deck from a topic and audience: plans the outline, drafts content and design in parallel, and runs an automated brand-QA pass. The workhorse for pitch decks and launch decks.

Needs Nothing (Python auto-installs in the sandbox). Use a local folder, not OneDrive-synced, or file execution is blocked.

Try saying `Create a launch pitch deck for [product]`

↓ Download skill

[View on Hub →](#)

SAP Branded Presentations v1.0

248 installs

Works out of the box

Generates self-contained, print-to-PDF HTML presentations following SAP brand palette, font, and logo rules, from 17 reference layouts. A lighter-weight alternative to the Power Point skill for fast, shareable decks.

Needs You supply image paths/URLs; it never invents images.

Try saying Create a presentation about the Q3 launch

↓ Download skill

[View on Hub →](#)

customer-success-story-slide v1.0

11 installs

Works out of the box

Generates an SAP-branded customer success-story slide from basic customer info, notes on how SAP helped, and contributing teams. Researches company facts and drafts a positive ~60-word customer quote within SAP branding guidelines. Fast reference-slide creation.

Needs Nothing to start (uses web for company facts). Community skill.

Try saying Create a success-story slide for [customer]

↓ Download skill

[View on Hub →](#)

Executive Communication v2.0

1,640 installs

Works out of the box

Transforms rough corporate notes into concise, executive-ready communication using a fixed Headline, Context, Impact, Decision/Support-Needed, Action structure. For leadership updates, analyst notes, and launch briefings.

Needs Nothing.

Try saying Turn these notes into an executive update

↓ Download skill

[View on Hub →](#)

5. Strategy & Data

Synthesize inputs into strategy and back decisions with data. All work out of the box.

The Strategic Edge – Pro Marketer 2.0 v2.0

40 installs

Works out of the box

A senior marketing-strategist and data-analyst layer above your copy and channel work: synthesizes fragmented inputs into one sharp, data-backed strategy, pressure-tests ideas, finds the data-driven red thread, and elevates output into a cohesive plan across channels.

Needs Nothing. Community skill.

Try saying Synthesize these inputs into a GTM strategy

↓ Download skill

[View on Hub →](#)

Data Analyzer v2.0

1,974 installs

Works out of the box

Profiles any dataset into a self-contained SAP-branded HTML report with executive findings, interactive charts, and a devil's-advocate quality review. Point it at content-performance, campaign, or win/loss data to find the story.

Needs Nothing (libraries auto-install; internet needed to load charts when opening the report).

Try saying Analyze this campaign performance data

↓ Download skill

[View on Hub →](#)

Excel v2.0

2,715 installs

Works out of the box

Creates, edits, and analyzes SAP-branded Excel spreadsheets locally with pandas and openpyxl: formatting, multi-sheet workbooks, formulas, plus a formula-error verification pass. For launch trackers, message-testing grids, and TAM/SAM/SOM models.

Needs Nothing.

Try saying Build a market-sizing model for [segment]

↓ Download skill

6. New to Joule? Start Here

If Joule Desktop is brand new to you, these two get you oriented fast.

Joule Onboarding & Migration v2.0

783 installs

Works out of the box

Conversational setup that either migrates config, memory, and MCP mappings from another AI tool (Claude, Cursor, ChatGPT, Copilot) or guides a first-time user to build Joule memory from scratch.

Needs Python available on the machine. No MCP.

Try saying `help me set up Joule`

↓ Download skill

[View on Hub →](#)

Teach Me Joule Desktop v1.0

722 installs

Works out of the box

Joule Hub (admin-managed)

Interactive, adaptive 9-module course on Joule Desktop: installation, Outlook/Calendar/PPT integrations, Spaces, skill and MCP installation, custom MCP config, usage and cost tracking.

Needs Uses the Joule Hub connector, which SAP pre-provisions (admin-managed), so there's nothing to set up.

Try saying `teach me Joule Desktop`

↓ Download skill

[View on Hub →](#)

Browse the full catalog (600+ skills and MCP servers) at hub.joule.only.sap. Install counts are a snapshot from 12 Aug 2026 and change as adoption grows. This shortlist is curated for SCM Product Marketing; it is not the full library. Several skills are community-built or tuned to a specific team's brand (SAP Concur, GFA), check each skill's Hub page for exact scope before relying on it.

Download links: each "Download skill" link pulls the skill file (a .md, or a .zip for multi-file skills) straight from the Joule Hub; then Upload it in Joule Desktop (Extensions → + New → Add Skill → Upload). The links require the SAP network, which your SAP PC's GlobalProtect VPN connects automatically.

Designed and powered by Mike Fecek and Claude.
